

“Future Teaching” *Webinar*
on how to use design approaches and co-creation
to create engaging and interesting teaching
Thursday the 24th of September 2020

The “FUTE project” was created to assist school managers and school teachers. The aim of the FUTE project is to motivate the use of design methods and collaborative processes in schools and classrooms, and between teachers and students, creating more active and engaging teaching and learning. To support this purpose, the FUTE project has developed a design thinking model, a set of method cards and training material that can help school leaders to make design and co-creation part of a school culture, as well as help teachers to apply design and co-creation processes actively with colleagues and students, in order to develop, plan and implement more engaging and active teaching.

www.fute-project.eu

To finalise this successful project, we invite you to a webinar where we will discuss and show concrete examples on how to use design methods in schools and especially how to use the FUTE approach and the FUTE method cards.

Because of the Corona crisis, this conference has been changed into a webinar, hosted by ZOOM. **The link to join the webinar will be send to you on the morning of the 24th of September.**

Time	Theme
13:00 – 13:20	Welcome to the FUTE project and presentation of the FUTE design model and the FUTE design method cards <ul style="list-style-type: none"> - What is the theoretical foundation for the design model and how can design approaches be used in the classroom to create teaching that motivates and engage. By Lene Nyhus Friis and Anne Katrine Gøtzsche Gelting, Designschool Kolding (DK)
13:20 – 13:40	Presentation of the FUTE Training Material <ul style="list-style-type: none"> - Making the teachers ready to use design approaches and engage with students and colleagues in a new way By Wouter Houstinx, PXL Teacher College (BE)
13:40 – 14:30 (including a 5 minutes “bio break”)	Good practice stories and experiences on how to use the FUTE material in practice. Involving the teachers, providing training to teachers, how to use the cards in the real world

	<p>and how the use of design methods go hand in hand with new curricula development in many European countries.</p> <p>Experiences will come from; Belgium, Denmark, Finland, France and UK</p> <p>By Yasmine Ennekens, PXL, Belgium & Per Holst-Hansen UC South, Denmark & Satu Grönmann, Turku University, Finland & Arnaud Zahou, Reseau Canopé, France & Gary Beauchamp, UK.</p>
14:30 – 14:45	Recommendations, upscaling and sustainability By Henriette Hansen, South Denmark European Office
14:45 – 15:00	Questions and discussion
15:00	End of Webinar

**Please register for the Webinar before
Tuesday the 22nd of September on**
